DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 3, 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by the applicant's cited reference US patent number 6,282,297 (Lin).

Regarding claims 1, 2, 3, 7 and 8, Lin discloses a loudspeaker system (figure 3) comprising a woofer (4), a midrange speaker (5), and a tweeter (3) support means (1, 11) having a mounting member shaped to be received in a plane in an opening in a wall or ceiling means mounting the woofer on the support means with the axis of the woofer at an acute angle to the plane, means (16, 23) securing the speaker and tweeter intermediate the woofer and the plane, each at an angle non-parallel to the acute of the woofer and at an acute angle to the plane.

Regarding claims 6, 9 and 10, Lin also discloses wherein the mounting member comprises an annular member (23) and having means (column 2

lines 37-41 item 16) for rotating the woofer, midrange speaker and tweeter with respect to the mounting member.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over US patent number 6,282,297 (Lin).

Regarding claims 4 and 5, Lin does not disclose the woofer baffle is a frusto conic baffle with one end secured to the face plane of the woofer and a grill cover.

However, the frusto conic baffle and a grill cover are well known in the art.

Therefore, it would have been obvious to a one ordinary skill in the art at the time of the invention was made to use these well known baffle and grill cover for directing a sound and protection.
